### Situation Awareness Brief

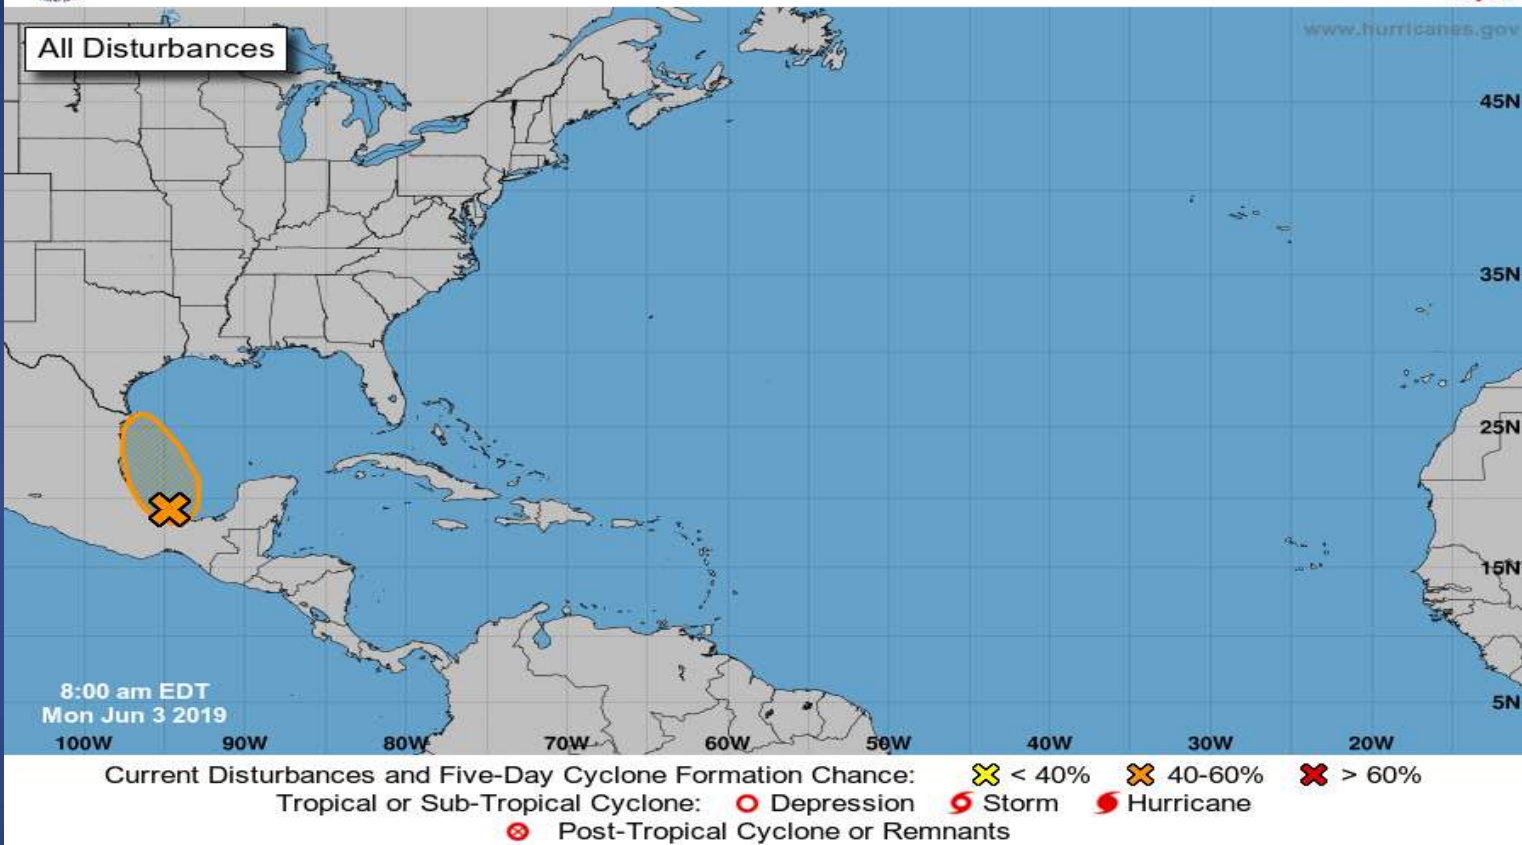

Monday, June 3<sup>rd</sup> 2019  
As of 0900 CST

# Tropical Weather Awareness

## Five-Day Graphical Tropical Weather Outlook National Hurricane Center Miami, Florida

A broad area of low pressure is producing disorganized shower and thunderstorm activity over the Bay of Campeche. This system is expected to move slowly northwestward toward the northeastern coast of Mexico, and could become a tropical cyclone before it moves inland in a day or two. Regardless of development, the disturbance will likely produce heavy rainfall over portions of southern and eastern Mexico during the next few days. An Air Force Reserve reconnaissance aircraft will investigate the disturbance this afternoon, if necessary. Interests along the Gulf coast of Mexico should monitor the progress of this system.

\* Formation chance through 48 hours...medium...60 percent.

\* Formation chance through 5 days...medium...60 percent.

# Hazardous Weather

# Hazardous Weather

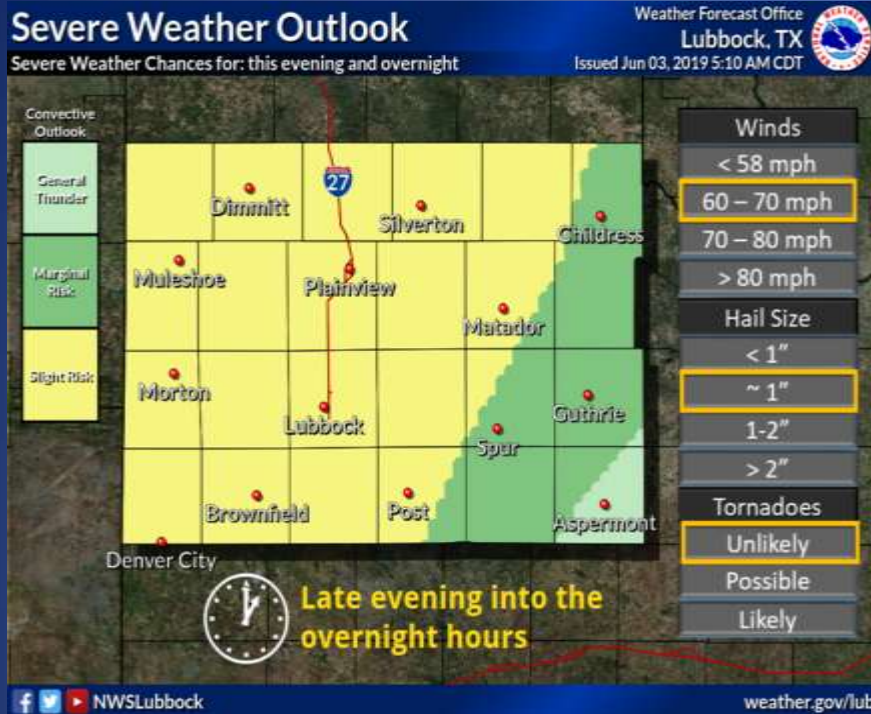

Severe thunderstorms with large hail...strong damaging winds and heavy rains may occur this afternoon and this evening across portions of southern New Mexico and west Texas. Most storms will occur east of the Rio Grande.

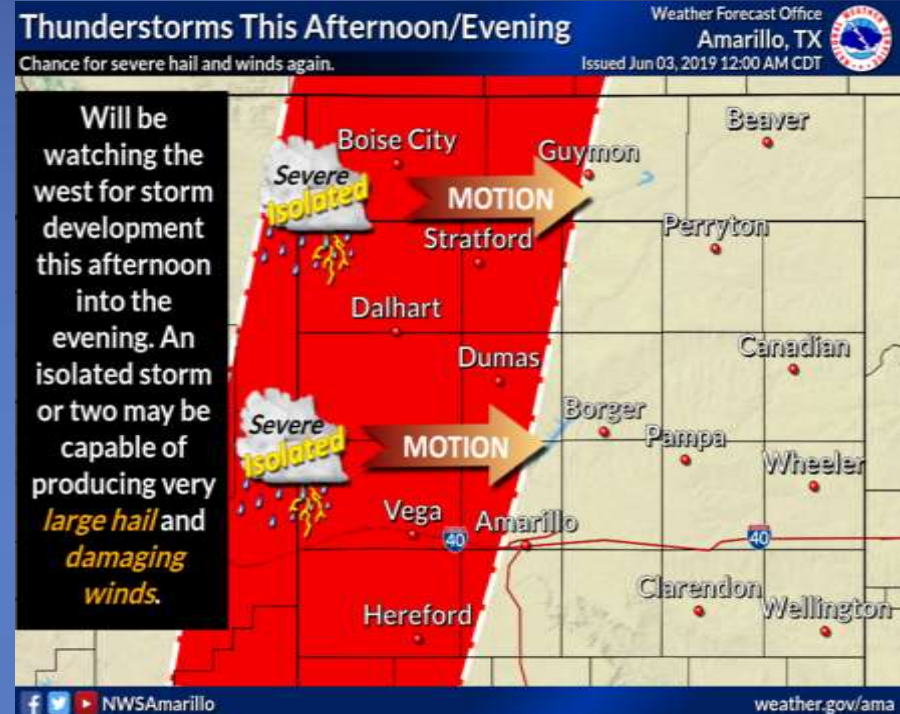

# Hazardous Weather

Thunderstorms will spread across parts of the the area again tonight with a slight risk for severe thunderstorms across much of the area. Hail to one inch diameter and wind gusts to 70 mph will be the primary risks, as well as local flooding from intense downpours.

Severe weather will be possible with large hail and damaging winds the main threats. A tornado can not be ruled out. Heavy rain may lead to isolated areas of flash flooding.

# Hazardous Weather

## Severe Storms Possible Monday

Scattered storms today; more storms possible tonight.

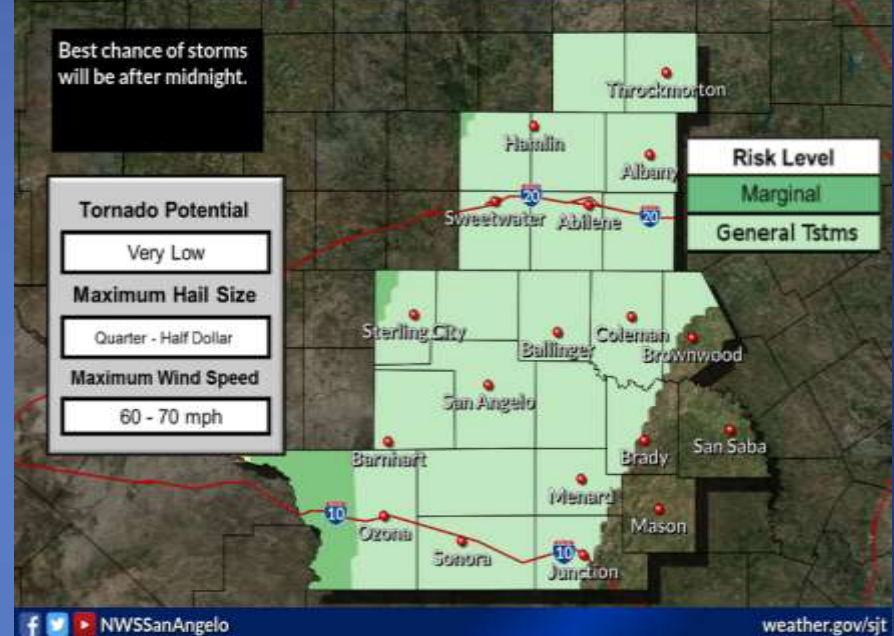

Weather Forecast Office  
Norman, OK  
Issued Jun 03, 2019 6:07 AM CDT

## Low Severe T-Storm Potential Today

Severe Weather Risk This Afternoon and Tonight

Weather Forecast Office  
San Angelo, TX  
Issued Jun 03, 2019 6:29 AM CDT

Mainly isolated afternoon and evening thunderstorm with a better chance of storms after midnight

# Hazardous Weather

## Today: Showers and Thunderstorms Possible

Weather Forecast Office

Fort Worth, TX

Issued June 3, 2019 5:14 AM CT

### This Morning (through Noon)

- Showers and storms expected this morning, mainly west of US HWY 281.
- Isolated storms possible elsewhere in the light green.
- Widespread severe weather unlikely, but strong winds, lightning and heavy rain can be expected.

### This Afternoon and Evening

- A few strong to severe storms will be possible this afternoon, mainly near and north of US HWY 380
- Farther south, storms should be more isolated.
- Main hazards will be strong to possibly damaging winds, hail and heavy rain (isolated flooding).

NWSFortWorth

[weather.gov/fortworth](https://weather.gov/fortworth)

Showers and thunderstorms will slowly progress eastward this morning before decaying by noon today. There will be a potential for renewed showers and storms this afternoon and tonight. There may be an associated strong to severe weather risk with activity in the afternoon (main hazards will be strong to severe-caliber winds, large hail and heavy rain).
